

St. Croix Preparatory Academy – Catch Up Math

How to Use Catch Up Math

How it works

Students simply go to the website catchupmath.com and press the Login button. Then, they enter **SCPA123** as the Login Name and enter the password they created at school (nameMMDD of their birthdate).

Your student was tested when they first logged in, and has been assigned a course of study. The resources to learn the material include:

- Short written lessons;
- Brief tutorial videos;
- Interactive exercises;
- Required practice problems or activities;
- Extra practice problems or activities;
- Flashcards for basic skills;
- ...And even **math**-related games, if they need a break (they can only win if they are getting better at **math**).

*** (Please note: Some of the practice problems have an extra “enter-an-answer” box at the top. Your student might want to enter an answer here if they think they already know how to solve this sort of problem, because if they do know how to solve it, they can advance more quickly.)
